Center for Occupational and Environmental Health Promotion

Celebrity Heroes to Inspire You

There are some inspiring celebrities out there who, in addition to their talent, also have the confidence to respond. Most recently, tough guy and avid golfer Clint Eastwood had a chance to shine more than usual at the AT&T Pebble Beach National Pro-Am tournament. At a volunteer party, he came to the aid of the tournament director when the gentleman began to choke on an appetizer. Eastwood successfully performed abdominal thrusts and was able to clear the obstruction.

According to an Associated Press article, Eastwood said, "I looked in his eyes and saw that look of panic people have when they see their life passing before their eyes...It looked bad."

And we're giving big thumbs up to rocker David Lee Roth, who is also a New York City EMT. In 2004, Roth used a defibrillator to save a woman's life.

When you put your training to use, or have the courage and compassion to get involved and render aid simply by calling 911, you are an instant celebrity to the person you are helping.

Ready to join your fellow stars? Take a CPR, AED, and First aid training class today!

American Safety and Health Institute Classes			
March 7	Basic AED/CPR First Aid (\$55)	9:00 AM - 1:00 PM	Johnson Center Rm 148
