Stakeholder Interview Meeting Highlights

Areas of Interest

- **Choice**
  - Low cost choice (possibly HDHP)
  - Maintain quality programs
  - Control cost and maintain value
  - Important to have broad national and local network access

- **Communication**
  - Effective communication so employees make wise choices
  - Ensure open and transparent communications with constituents

- **Maintain benefit programs that are fiscally responsible**
  - Consider different salary tiers – parity in salary and paying for benefits

- **UNM Health Sciences Center**
  - Leverage their capabilities and resources as appropriate to benefit the members health and the overall plan costs

- **Culture of Health**
  - Support a culture of health
  - Drive for more employee accountability/responsibility
  - Use benefit plans to drive behavior modification, using carrots (and sticks if appropriate)

- **Other items for consideration**
  - Alternative benefits: child care, off campus gym memberships, CNM tuition remission
  - Other Elective benefits that benefit members without increasing UNM’s costs
Stakeholder Interview Notes

- Benefits as an attraction/retention tool
  - Not an overwhelming feeling that benefits really drive recruiting and retention
- Benefits are part of a Total Compensation Package and there should be consistency in how it is treated year over year
  - Total compensation and rewards; recognition that they all tie together
- Strike balance of “we are all in this together and we will spread the risk” and “we all have a personal responsibility to manage and maintain a competitive program”
- A successful program would create stability and integrity
- Would like equality between employees at all locations – branch campuses can’t easily access Lobo-care
- Rather sacrifice salary for benefits
- Maintain the parity in costs with varied salary tiers
- Be fiscally responsible – control cost and create value
- Avoid Excise Tax
- Evaluate lower cost options
  - HDHP with HSA
  - HMO with narrow network (UNM Health)
- Too many carriers – efficiency and leverage
- Focus on giving more choice; one size does not fit all
  - More choice through alternative plan designs
  - Important to have broad national and local network access
    - Need to have network choice while promoting and incenting use of UNMH facilities/programs
    - Cost effectiveness and quality of network should trump the specific network; incent higher performing networks
- Benefits need some simplicity, ease of use, efficacy for the member at time of decision making
  - Increase the understandability and the value the benefit package provides
  - More employee education on benefits
Stakeholder Interview Notes

• Leverage UNM HSC as an expert provider
  • This is the best opportunity to get the greatest and best care
  • Access at HSC needs to be better
  • Partner with HSC when applicable and appropriate on Rx and Wellness
• Drive for more employee responsibility/accountability to be a part of the destiny of the plan
  • Empower employees
• Willingness to compromise across stakeholder groups
• Make data driven decisions
• Be creative in looking for opportunities
• Communication and feedback is critical
  • Develop a strong partnership between UNM and the Health System to communicate regularly
  • Conversations that are open and early
  • Over communicate to build trust
• Use incentives to encourage an active role in health and wellbeing
  • More active plan that looks at increasing preventive services and wellness using discounts and “carrots”
  • Wellness should be integrated into the plan
  • Wellness should extend beyond employees enrolled on the plan
  • Would like to see more wellness programs but not force employees to participate
• UNM is contributing less towards the cost of retiree coverage and not at the same level that was communicated when hired/retired
• Good selection of alternative benefits
  • Gym membership off campus, Child Care
  • Tuition remission should be expanded to include CNM remission and expand to include graduate students

UNM Benefit Plan Mission Statement

UNM is committed to providing efficient, competitive, sustainable, and fiscally responsible benefits for the diverse needs of our faculty and staff by offering benefits that leverage our resources, provide superior quality, encourage healthy behaviors, and are enhanced by collaboration and open communications.

UNM Benefit Plan Guiding Principles

- To attract and retain a diverse faculty and staff, we will offer competitive, efficient, and comprehensive benefits, with meaningful choices
- We will leverage and maximize HSC capabilities to the benefit of the plan and its members
- We will offer effective programs, resources, and tools to increase member engagement, accountability, and wellbeing
- Our programs and services will be well-communicated, simple, understandable, and easy to use
- We will maintain a fiscally responsible program, because that is paramount to the long term health and sustainability of the benefit offerings
